

SECUR (G.C.)

No. _____ Date, _____

Disease, _____

Name, _____

THE
PHYSICIAN'S
Bedside Record.

DIRECTIONS FOR USE.

Each book designed for use in but a single case.

The physician writes his directions for the treatment of the patient at the bottom of the page each day.

The nurse is to record each and every event connected with the patient at the time of its occurrence.

ESTABLISHED 1855.

Self-Registering Fever Thermometers,

WITH ABSOLUTELY INDESTRUCTIBLE AND UNCHANGEABLE INDEX.

DO NOT INCREASE THEIR READINGS WITH AGE.

Ask for a Thermometer with our name, trade-mark and 342 on the back.

Price, in Hard Rubber Case, each, Sizes 4 and 5 inches, . . . \$1.25
 Price, in Gold-Plated Case, with chain for vest-pocket, each, . . . 1.50

THOROUGHLY SEASONED AND PERFECTLY ACCURATE.

VICTOR No. 1,

A THREE-CURRENT FARADIC BATTERY,

FOR MEDICAL USE.

COMPACT, DURABLE, NEAT AND CHEAP.

CURRENT PLEASANT AND UNIFORM, MILD AND POWERFUL.

Size of box, $5\frac{1}{2} \times 3\frac{1}{4} \times 3\frac{1}{4}$ inches.

PRICE, . . . \$3.50 each.

SEND FOR CATALOGUE.

H. WEINHAGEN, 22 and 24 N. William St., New York.

DISINFECT THE DISCHARGES.

"As a matter of precaution we ought always to destroy the stools of fever and diarrhoea. It is wanton recklessness to allow them to pass into the sewers or cesspools. This is how disease is spread and perpetuated, when it should be stamped out. Whatever disinfectant we employ should be used *at once*, and of strength sufficient to accomplish the object in view. These are hints which should be reduced to practice without delay."

"*The Lancet*," London.

"The importance of disinfecting the expectorations of patients suffering from chronic pulmonary disease, and the alvine discharges in fevers, diarrhoeas and dysenteries, it seems to us, has not been sufficiently urged upon the profession.

"We would recommend for all these purposes, the powerful, yet odorless solution, known commercially as **PLATT'S CHLORIDES**. Free from all objectionable features, it is peculiarly adapted to all the requirements of the sick room."

ALFRED L. LOOMIS, M. D., LL. D.,

19 W. 34th Street, New York.

Ex-President Med. Soc. State of New York; Prof. of Pathology and Prac. of Medicine, University City of New York; Physician to Bellevue, Mt. Sinai and Charity Hospitals, &c.

In All Fevers, in Diphtheria and all Contagious or Infectious Diseases, the liberal use of Platt's Chlorides for rinsing the vessels, disinfecting the discharges and deodorizing and refreshing the apartment has proven extremely valuable; while in every sick room, whether the disease be contagious or not, the frequent use of this odorless liquid proves an aid and blessing to the patient and a comfort and protection to the attendants.

PLATT'S CHLORIDES is sold in quart bottles only, by druggists everywhere. Price, 50 cents. Each quart prepares two or three gallons of powerful disinfecting fluid. Full directions for use upon each bottle.

HENRY B. PLATT,

36 Platt Street,

NEW YORK

DIRECTIONS FOR
PEPTONISING MILK
WITH
PEPTONISING TUBES.

(FAIRCHILD)

Into a clean quart bottle put the powder contained in one of the glass tubes, and a small teacupful of cool water, shake; then add a pint of fresh cool milk, and shake mixture again.

Place the bottle in water so hot that the whole hand can be held in it without discomfort for a minute, and keep the bottle there for exactly 15 minutes. At the end of that time put the bottle *on ice*, to check further digestion and keep the milk from spoiling.

DIRECTIONS FOR MAKING
JUNKET AND WHEY
WITH
ESSENCE OF PEPSINE.

(FAIRCHILD)

JUNKET.

Take one-half pint of fresh milk, heated as hot as can be agreeably borne by the mouth, add one teaspoonful of Essence of Pepsine, and stir just enough to mix. Let it stand till firmly curdled; may be served plain or with sugar and grated nutmeg.

WHEY.

Curd warm milk with the Essence of Pepsine as above directed; when firmly curdled beat up with a fork until the curd is finely divided, now strain and the Whey is ready for use.

Whey is a highly nutritious fluid food, containing in solution the sugar and the salts (the mineral constituents) of the milk, and holding also in suspension a considerable portion of caseine and fat (cream) which pass through the strainer. It is peculiarly useful in many ailments, and always valuable as a means of variety in diet for the sick. It is frequently resorted to as a food for infants to tide over periods of indigestion, summer complaints, etc.

DIRECTIONS FOR PREPARING
"HUMANISED MILK"
WITH
PEPTOGENIC MILK POWDER.

(FAIRCHILD)

Put into a clean bottle 4 measures of the powder, half a pint of cold water, half a pint of cold fresh milk and 4 tablespoonfuls of cream.

Shake well, place the bottle in a pail of water (at least a gallon) as hot as can be borne by the whole hand (115° F) and keep the bottle there for exactly 15 minutes. Then pour all into a saucepan, and *quickly heat to boiling point*, with constant stirring. It is now ready for use.

In summer complaint, or in case of feeble digestion, the milk may be kept for 30 minutes in the hot-water bath before scalding. This secures the more complete digestion of the caseine needed in such cases.

FAIRCHILD BROS. & FOSTER,
NEW YORK.
